REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

3. The independent claims 11 and 20 of the present application teach for example,

A method for transmitting data, comprising:

inverting the data to be transmitted;

forming, according to a specifiable signature formation method, a first signature

as a function of both the data to be transmitted and the inverted data;

transmitting the first signature together with the data to a receiver;
inverting the transmitted data at the receiver;
forming a second signature in the receiver according to the specifiable signature formation method as a function of both the transmitted data and the inverted transmitted data; and
comparing the first signature with the second signature.

The foregoing limitations are not found in the prior art of record. Particularly, none of the prior arts of record teach nor fairly suggest the emphasized limitation as cited in the independent claim 15 that comprise:

inverting the data to be transmitted;
forming, according to a specifiable signature formation method, a first signature as a function of both the data to be transmitted and the inverted data;
transmitting the first signature together with the data to a receiver;
inverting the transmitted data at the receiver;
forming a second signature in the receiver according to the specifiable signature formation method as a function of both the transmitted data and the inverted transmitted data; and
comparing the first signature with the second signature.
